

ZINC MINI DRILL STAND

WE 24902 SERIES

Thank you for purchasing WECHEER professional power tool accessory.

Please feel free to contact your local suppliers for our other fine tools and accessories.

OVERVIEW

1. Metal structure ensures stability and precision.
2. Compatible with cylindrical power tools with a diameter of 15/16" (24 mm) to 1-21/32" (42 mm).
3. Adjustable height with a range of 3" (75 mm).
4. Base dimensions: 4-3/4" (120 mm) x 4-25/16" (125 mm).

OPERATION

1. Working platform should be flat and leveled. Avoid damaging the stand by dropping.
2. Clamp the rotary tool securely, at a point 1/3 to 1/2 to the bottom end of the tool.
3. Connect the pushing stick to (#5 on the picture).
4. Loosen the rings (#2, #3, #4 on the picture) with the included L-shaped wrench.
5. Tighten ring #2 to set the working height of the rotary tool.
6. Tighten ring #3 to set the highest point of the rotary tool.
7. Tighten ring #4 to set the lowest point of the rotary tool.
8. The wire clamp on the back of the device can be used to organize the motor's wire. (#6 on the picture)
9. This stand is most compatible with WE247 (sold separately).
10. Keep dust out of eyes and lungs by using a protective eyewear or a dust mask.
