

Multi-Use Heavy Duty Power Tool Kit Models 330, 340 Series

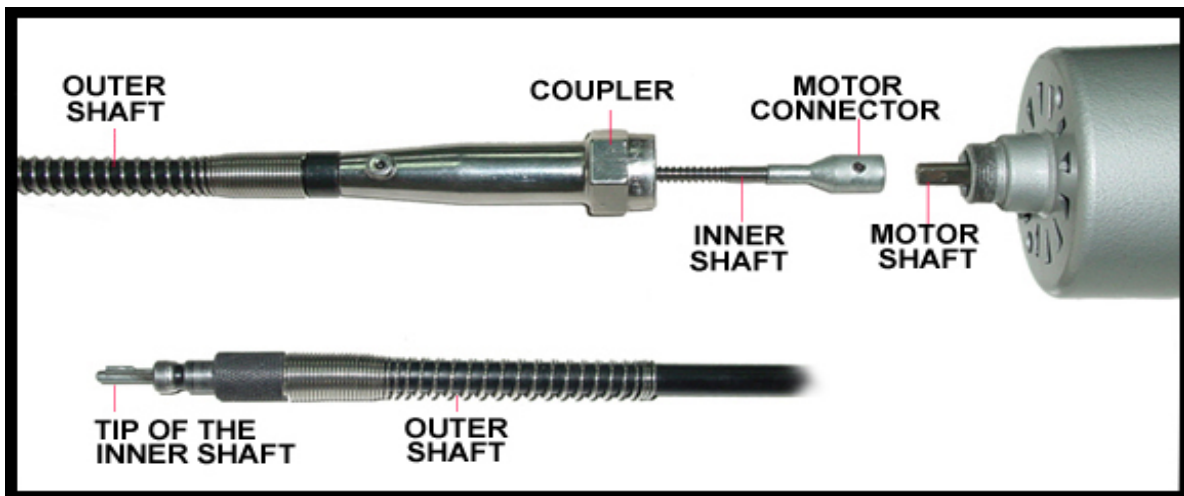

WECHEER Heavy Duty Power Tool is a recognized and approved system by CSA authority. It can be used with hundreds of different rotary tool accessories for grinding, sanding, polishing, cleaning, drilling, carving, shaping and much more. This precision designed tool will give you years of trouble-free performance with proper use.

SAFETY RULES

1. Before connecting the tool, be sure voltage supplied is the same as that specified on the nameplate of the tool.
2. Always make sure your power tool is unplugged when you change accessories or collets.
3. Do not touch the bit or collet after use. The bit and collet are too hot to be touched by bare hands after use.
4. Keep dust out of eyes and lungs by using a protective eyewear or a dust mask. (Always wear safety goggles when cleaning tools with compressed air.)
5. Change direction only after the motor has completely stopped (reversible motors only) to prevent damage to the device and/or causing dangers.

ASSEMBLY INSTRUCTIONS

- 1 **Inner Shaft:** Loosen the screw on the connector of the inner shaft then slide it onto the motor shaft. Tighten the screw onto the flat in the motor shaft.
- 2 **Outer Shaft:** Tighten the coupler to the motor.
- 3 **Handpiece:** Attach the handpiece by pushing it on the outer shaft. Be sure that the tip of the inner shaft is properly lined up with the slot in the rear of the handpiece.

MAINTENANCE INSTRUCTIONS

- 1 **Cleaning:** The Rotary Tool may be cleaned most effectively with compressed dry air.
- 2 **Lubrication:** Do **NOT** add any grease to the inner shaft anytime. Improper lubrication will shorten the life of your tool.
- 3 **Motor Brushes:** Only WECHER replacement brushes (Model 25299) specially designed for your tool should be used. After replacing brushes, the tool should be run at no load for 5 minutes before loading (or using) the tool. This will allow the brushes to “seat” properly and will give you more hours of life from each set of brushes.

Thanks you for purchasing WECHER professional heavy-duty power tool kit. Please feel free to contact with your local supplier for our other fine tools and accessories.
